# Deliver your **ESG** objectives and confidently report on initiatives

Camms.

Software to Change Tomorrow.

An integrated approach to deliver your ESG objectives

Plan and execute your ESG strategy and confidently report on the progress of key metrics and initiatives.
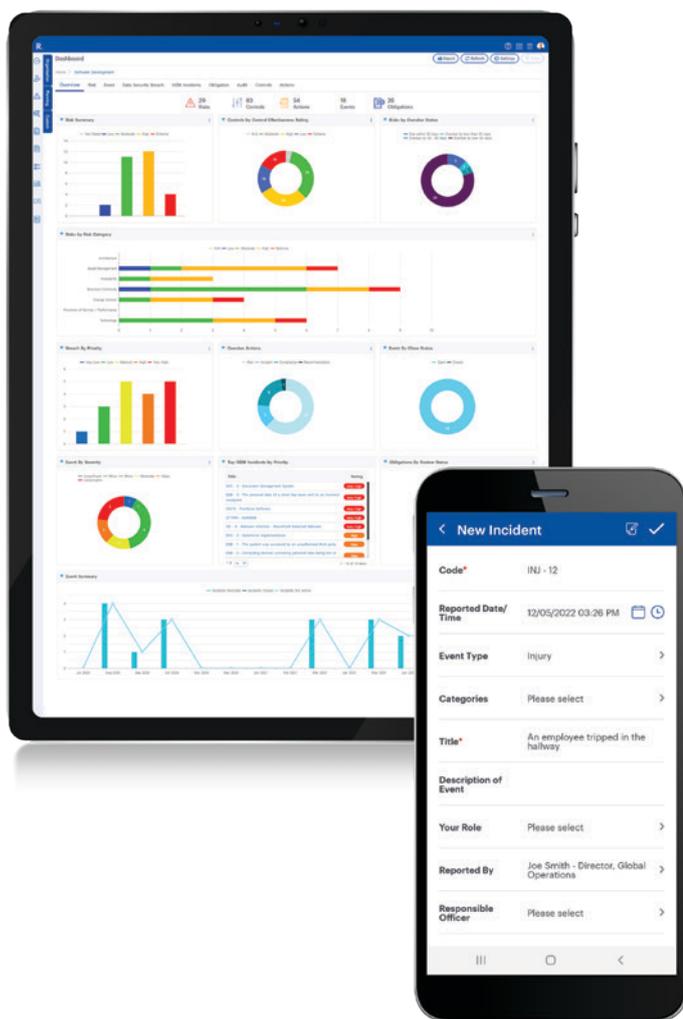

Plan an ESG Strategy

Map out an ESG strategy with clearly defined goals, objectives, and KPI's - and track progress.

Manage ESG related Risk

Set up a digital online risk register to categorise and rate risk, conduct risk assessments, and set controls to mitigate risk.

Comply with ESG Obligations

Create a library of ESG related obligations, assign ownership, set controls, and monitor compliance.

Manage ESG related Incidents

Create a best-practice incident management process to log ESG related incidents, accidents, hazards, and near misses, and monitor cases until closed.

ESG Project Management

Plan out large scale ESG related projects and portfolios to implement green initiatives and drive a more ethical operating model.

Camms.

Why implement **ESG** software?

- ✓ To provide proof of ESG credentials to management, investors, and regulators.
- ✓ To centralise ESG related data and align the organisation on ESG initiatives.
- ✓ To understand progress on ESG strategic initiatives and monitor progress.
- ✓ To proactively manage ESG related risks and implement relevant controls.
- ✓ To identify operational cost savings efficiencies, and opportunities.
- ✓ To effectively monitor compliance with ESG related regulations.
- ✓ To simplify stakeholder reporting communications on ESG.
- ✓ To create an ethical, greener organisational culture.
- ✓ To gain funding for ESG related projects.
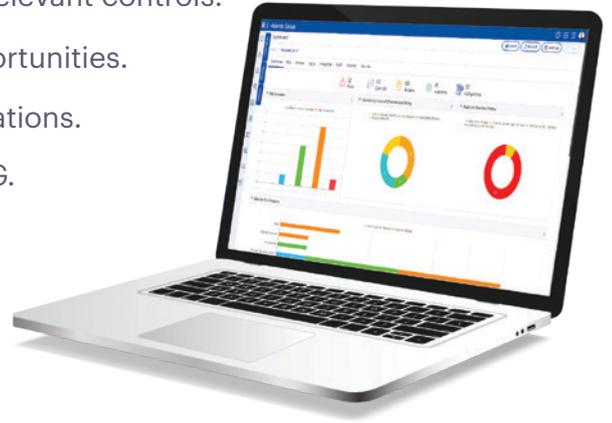

Why choose Camms for **ESG**?

API Integrations
Pull in data from other sources via APIs – enabling you to set controls and KPI's against ESG data in other systems and assign tasks to your active directory.

Stakeholder Reporting
Provides ESG teams with the insight they need to demonstrate progress against ESG goals & objectives and get immediate visibility through aseries of insightful dashboards & reports.

Integrated Cloud-Based Platform
The platform is built from the ground up using single source code enabling complex mapping between strategic planning, risk, and project management.

Highly Configurable
Admins can easily amend reports, menus, and dropdowns to meet the bespoke needs of the organisation without professional services fees or coding.

Rapid Time to Value
Our solutions can be implemented quickly for fast ROI. Our average go-live time is around 3 months and can be even faster for out-of-the-box implementations.

Customer Support
Our customer support team is there for you through every step of your implementation to ensure you get the most out of the Camms platform.

Modular & Scalable
Start out by implementing modules that meet your immediate needs add more functionality as and when required.

Out-of-the-Box
Best-practice frameworks, online forms, templates, automated workflows, and dashboards & reports make the solution easy to set up.

ESG Capabilities

ESG Strategy & Objectives

Plan, develop, and execute your ESG strategy and confidently report on the progress of initiatives, goals and objectives.
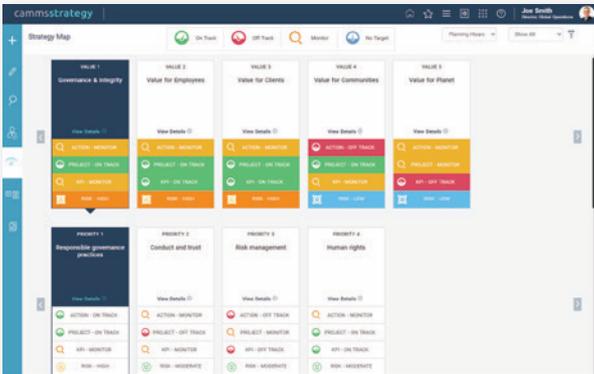

- ✓ Create an ESG strategy with clearly defined goals, objectives, and KPI's.
- ✓ Break down your strategic plan into smaller programmes, projects, tasks, and actions and monitor progression.
- ✓ Set budgets, timelines, and KPI's and log dependancies & risks.
- ✓ Get a birds eye view of your ESG strategy with tree views.
- ✓ Use workflows to flag deadlines & overspends to resolve issues.

Manage ESG Related Risk

Manage environmental and social related risks and implement governance to ensure the relevant controls and treatments are in place.
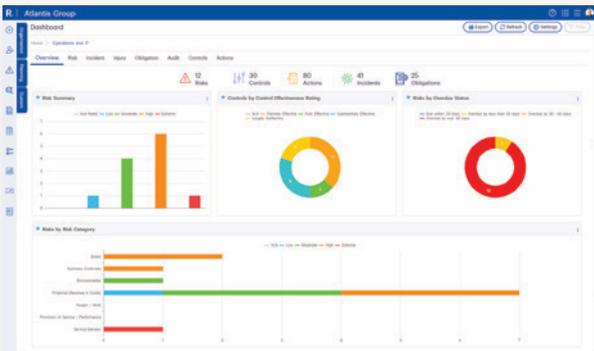

- ✓ Create an online ESG risk register with KRI's and a predefined framework to categorise, rate, and monitor ESG risks.
- ✓ Roll out online risk assessments, surveys & tasks with all data feeding directly into the tool.
- ✓ Automated workflows for approvals and escalations.
- ✓ Implement risk treatment plans and implement controls.
- ✓ Pull live data into the tool from other sources via APIs.
- ✓ View comprehensive dashboards & reports to build a holistic view of risk and link risk back to strategic objectives.

ESG Compliance

Identify and effectively manage your ESG related obligations and provide demonstrable proof of compliance.
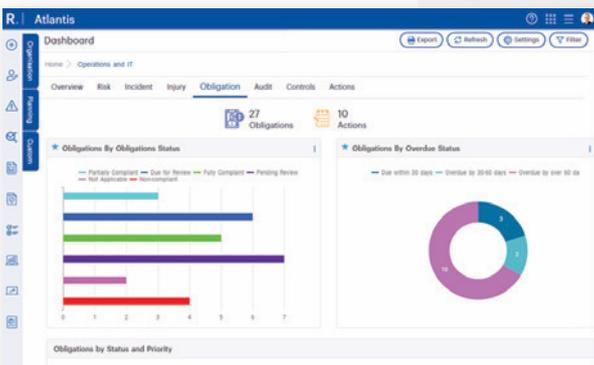

- ✓ Build a detailed obligations library of applicable legislation, regulations, and internal policies - and assign accountability.
- ✓ Set controls and perform 'checks' to monitor compliance.
- ✓ Identify problem areas, and initiate corrective actions.
- ✓ Adhere to globally recognised compliance frameworks like ISO standards, The GRI, The CSRD, IFRS, CDSB, and TCFD.
- ✓ Implement best practice policy management and regulatory change processes.
- ✓ Access dashboards & reports to monitor compliance.

Camms.

ESG Incident Management

Capture incidents, events and near misses related to ESG initiatives in real-time and manage cases through to resolution.
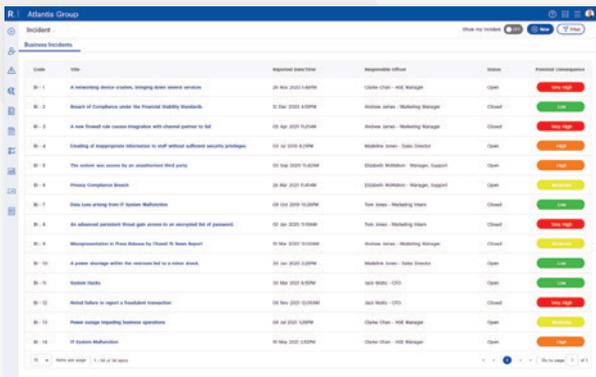

- ✓ Log incidents, hazards, and near misses online or via the mobile app.
- ✓ Conduct investigations to determine impact and implement controls & treatment actions.
- ✓ Utilise automated workflows for approvals, signoffs, and escalations.
- ✓ Link incidents back to the originating risks.
- ✓ Implement an incident reporting portal for third parties and anonymous whistle blowing.
- ✓ Produce an audit trail for stakeholders & regulators with real-time reporting.

Online Registers & Workflows

Keep track of the ESG metrics you need by setting up online registers with integrated workflows to automate any spreadsheet-based process and bring it online.
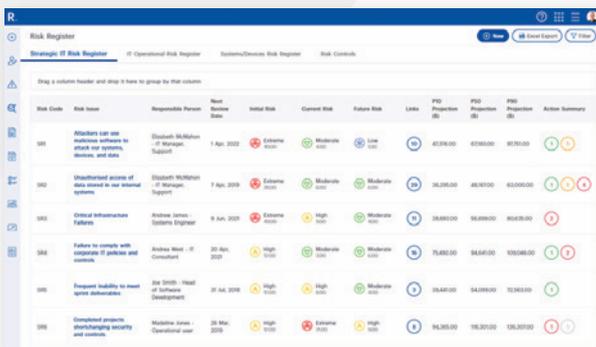

- ✓ Formalise any ESG business process using automated workflows, digital registers and online forms.
- ✓ Popular ESG use cases include: feedback & complaints, conflicts of interest, gifts & gratuities, disclosures, contractor management, inspections & site checks, whistleblowing, chemicals register and questionnaires.
- ✓ Implement workflows for signoffs, approvals and escalations.
- ✓ External facing portal to capture information from suppliers & contractors.

Project Management

Implement best-practice project management processes to deliver effective ESG related projects & portfolios from inception to close.
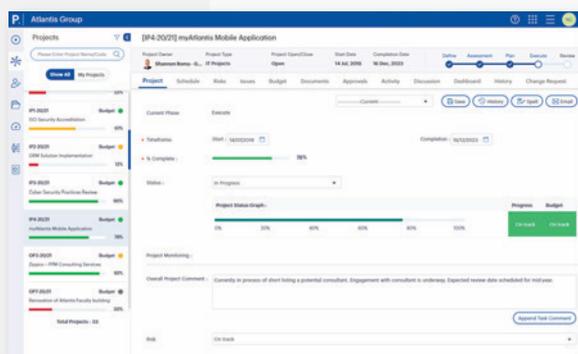

- ✓ Effectively colaborate on ESG related projects & portfolios by breaking them down into smaller programmes, tasks, and actions to ensure completion.
- ✓ Set budgets, timelines and KPI's, and monitor spend, dependencies, and risks for each stage of the project.
- ✓ Track progress against key performance indicators and capture lessons learnt.
- ✓ Prioritise projects based on budgets and criticality to easily allocate budget and resources.
- ✓ Easily report on project progress to stakeholders, reducing lengthy status update meetings.
